Underpinned by a powerful inspections engine, the Ready Community Licensing & Compliance suite includes the following modules:

Health Manager

High integrity management of environmental health issues, premises, equipment and licenses is a critical success factor for any organisation charged with the responsibility of enacting public health regulation.

- **Designed by EHOs, for EHOs:** Our world class environmental health management solution is designed in collaboration with Environmental Health Officers (EHOs)
- **Seamless flow of information:** Delivers complete integration with any ERP solution.
- **Easily deployed on-premises or in the cloud:** Health Manager helps EHOs better track and register all Food and Health Premises, Waste-Water, Tobacco Retailers, and Cooling Towers.

Local Laws Permits

Managing a diverse array of local laws, permits, and licenses is a multifaceted task for councils. These regulations encompass activities of varying risk levels, collectively shaping the organisation's reputation for quality, integrity, and customer service.

Designed to ensure a seamless and efficient execution of local laws, this solution empowers councils with the tools necessary for maintaining high standards across their operations.

- **Permit lifecycle tracking:** Effortlessly monitor permits from initial application to final completion, ensuring a smooth progression through every stage. Generate permits seamlessly within the system, integrating all necessary components for a cohesive and efficient issuance process.
- **Renewal management and fee control:** Easily handle permit renewals and associated fees, streamlining the entire renewal process for uninterrupted compliance.
- **Comprehensive compliance management:** Maintain complete oversight of compliance with a comprehensive management scope, keeping your operations aligned with regulatory standards.

Animals

Manage animals comprehensively with efficient registration, online payments, microchipping, integration, 24/7 public records, pound management, deceased animal handling, pet owner access, and more.

Effectively manage a high volume of registrations, streamlining the registration process for enhanced efficiency.

- **Microchipping management:** Fully control the microchipping of animals, ensuring meticulous management and record-keeping.
- **24/7 public animal records:** Access public animal records around the clock, providing convenient and continuous information availability.
- **Pet owner access:** Grant pet owners' direct access to manage their pets, enhancing their involvement and control over pet-related information.

Town Planning

Ensure thorough town planning management with due process assurance, decision support, stakeholder engagement, and efficient execution.

- **Due process assurance:** Provide tools and insights for informed planning decisions, and ensure adherence to established procedures and regulations.
- **Seamlessly integrated town planning:** Facilitate high-quality, efficient and effective planning processes. Handle all aspects of Town Planning in one solution.
- **Enhanced stakeholder engagement:** Enable developers, partners and authorities to access relevant information with self-service access.

Building

Ready Community's Building module provides everything you need to achieve high quality efficient and effective execution of fully managed building application processes, including:

- Application lodgement, billing and on-line payment processes
- Effective stakeholder communication and correspondence management processes
- Application review, decision support and approval processes
- Inspection, audit and review processes
- Transactional risk rating and escalation
- Correspondence management

Family Services

Our Family Services module oversees the efficient management of kindergartens, child care centres, and third-party providers for streamlined child care registration.

Our solution simplifies the child care registration journey for daycare and kindergarten, fostering seamless development and offering parents a sense of reassurance.

- **Versatile payment management for parents and guardians:** Experience hassle-free payment management tailored to parents and guardians, offering flexibility and convenience.
- **Seamless integration with GIS and property systems:** Our system integrates seamlessly with Geographic Information Systems and property databases, ensuring precise distinction of priority access and zoning for child care registration.
- **Attendance assessment with comprehensive tracking management:** Track attendance with meticulous detail and access in-depth reports, providing a comprehensive overview of child care participation.

Infringements

Enhance infringement issuance with mobile convenience, data integration, central access, and customisation.

- **Field-friendly infringement issuance:** Rangers can issue infringement while in the field, with immediate data synchronisation to the ERP system.
- **Comprehensive data integration:** Utilise data from user, mobile devices, external sources, and other systems to manage infringements across their lifestyle.
- **Centralised information access:** Access, update, and generate reports, offender letters, and exportable data, ensuring efficient utilisation of all information.

Parking Permits

Effortlessly oversee the complete lifecycle of parking permits, from issuance to renewals, ensuring a well-organised and efficient process.

- **Instant parking permit lookup:** Access real-time permit information swiftly, providing immediate verification to enhance parking control and management.
- **Automated eligibility criteria calculations:** Utilise automated calculations to determine eligibility criteria, simplifying the process of permit approval based on predefined rules.
- **Inspections and car spot management:** Facilitate inspections of permit areas, including efficient car spot management, to maintain compliance and enhance parking space utilisation.
