

## ready community | Property & Rates

Ready Community Property & Rates is a market-leading solution that opens and connects property and rating information throughout the organisation using a customer-centric approach. Delivering speed, accessibility and enhanced navigation, the solution is built based on best practices, leveraging ReadyTech's deep domain expertise and feedback from our 300+ local government customers.

A specialised subledger, it is built for local and state governments and can be used stand-alone or alongside your Finance system as part of your complete ERP solution. Natively integrated with our Ready Community ERP suite, you can seamlessly navigate from the Property solution to all other Ready Community modules, including Finance, Payroll and Customer Experience.

## Your end-to-end digital solution for property lifecycle management.

Taking a decentralised approach to property information, Ready Community Property & Rates delivers a powerful billing engine that is incredibly efficient in processing large property and rating data sets.

Property & Rates is built with enterprise-level functionality but with the user experience top of mind. The product focuses on convenience and value for public sector users, solving often manual and resource-intensive processes through speed and efficiency in raising rates, accessing property information, generating rate notices, and more.

The solution is fully scalable to suit councils of all sizes, from small to extremely large data sets, without impacting functionality. Peak usability and intuitive functions deliver a smooth and well organised user experience, modernising a multitude of rates applications.

- **Speed and accessibility:** Enjoy lightning-fast access and intuitive navigation for property and rating information.
- **Expert-backed solution:** Built on industry best practices, drawing from extensive domain expertise and feedback from 300+ local government customers.
- **Fully responsive design:** Scales to fit any device, including mobile and tablets, allowing information to remain accessible from anywhere.
- **Tailored for government:** Designed specifically for local and state governments, it can work as a stand-alone system or seamlessly integrate with your finance system within your ERP solution.
- **Fully configurable:** Aligns with existing business processes, terminology and custom fields or datasets, allowing you to easily manage change and user uptake across your organisation.
- **Cloud-based security:** Securely delivered through the cloud, ensuring information is always available without compromise.
- **Leverage existing tools:** Such as Office 365 and other Microsoft technologies, including full support for Single Sign On.
